

OOPS

↳ create an object

↑ hold their

↳ data, functionality.

that type of object
create with
blue print
model

// old

// constructor function

```
function CUPCAKE C() {
```

capital case

this.name = "chocolate";

add value
in blank object

}

```
let c1 = new CUPCAKE C();
```

↑ create blank object
in mind

log c1;

↳ object

↳ { name: "chocolate" }

// new

```
class TOFFEE {
```

```
  constructor C() {
```

```
    this.name = "chocolate";
```

```
    this.price = "10";
```

```
  }
```

```
}
```

```
let T1 = new TOFFEE C();
```

↑ when we
write this
creates it's
call a constructor.

what to do?

↳ class

↳ create many object

↳ data
functionality

it's called
method

↑ we follow the concepts
of OOPS so that we don't
have to do this manually.
